

ICA European Symposium on
CARTOGRAPHY

VIENNA, 10–12 NOVEMBER 2015

Proceedings of the

**1st ICA European
Symposium on Cartography**

Georg Gartner and Haosheng Huang (Editors)

Vienna, Austria

November 10–12, 2015

International Cartographic Association
Association Cartographique Internationale

Editors

Georg Gartner, georg.gartner@tuwien.ac.at

Haosheng Huang, haosheng.huang@tuwien.ac.at

Research Group Cartography

Vienna University of Technology

This document contains the online proceedings of the 1st ICA European Symposium on Cartography (EuroCarto 2015), held on November 10-12, 2015 in Vienna, Austria. The symposium was organized by the Research Group Cartography, Vienna University of Technology, and endorsed by International Cartographic Association (ICA) and Österreichischen Kartographischen Kommission (ÖKK).

Type setting of the chapters by the authors,
processed by Manuela Schmidt, Haosheng Huang and Wangshu Wang.

Think before you print!

Table of Contents

Section I: Cartographic Modelling and Design

<i>Jari Korpi and Paula Ahonen-Rainio</i> Design Guidelines for Pictographic Symbols: Evidence from Symbols Designed by Students	1
<i>Andrea Nass and Stephan van Gasselt</i> Dynamic Cartography: Map-Animation Concepts for Point Features	20
<i>Sarah Tauscher and Karl Neumann</i> A Displacement Method for Maps Showing Dense Sets of Points of Interest	22
<i>Jakub Straka, Marta Sojčáková and Róbert Fencík</i> Model of Dynamic Labelling of Populated Places in Slovakia ...	24
<i>Wasim A. M. Shoman and Fatih Gülgen</i> A Research in Cartographic Labeling to Predict the Suitable Amount of Labeling in Multi-Resolution Maps	26
<i>Jana Moser and Sebastian Koslitz</i> Pins or Points? Cartographically Appealing Webmaps and Technical Challenges: the Example of “Landschaften in Deutschland Online”	28
<i>Alžběta Brychtová and Jitka Doležalová</i> Designing Usable Sequential Color Schemes for Geovisualizations	31
<i>Paweł Cybulski</i> Visual Suggestiveness and Change Blindness in Dynamic Cartographic Visualisations	33

<i>Jochen Schiewe</i>	
Preserving Attribute Value Differences of Neighboring Regions in Classified Choropleth Maps	35
<i>Giedrė Beconytė</i>	
Application of Conceptual Model in Thematic Mapping: Representation of Relationships	37
<i>E. Lynn Usery</i>	
Semantic Representation of Topographic Data for Cartographic Presentation and Application	39
<i>Salla Multimäki, Antti Mäkilä, Jari Korpi and Paula Ahonen-Rainio</i>	
Combining Two Datasets into a Single Map Animation	41
<i>Jolanta Korycka-Skorupa and Tomasz Nowacki</i>	
The Complexity of Cartographic Presentation Types.....	43
<i>Viktor Putrenko</i>	
The Spatial Statistical Generalization of Information for Regional Land-use Management in Ukraine	45
<i>Anna Vetter and Mark Wigley</i>	
Challenging Cartography in ArcGIS from Esri Switzerland	48
<i>Dominik Käuferle, Christoph Streit and Olaf Forte</i>	
New National Maps for Switzerland	50
<i>Alexander Knapp and Andreas Pammer</i>	
Automated Generalization at BEV – From Base Models to 1:50k Map	52

Section II: Spatial Analysis and Geovisual Analytics

Gennady Andrienko, Natalia Andrienko, Alexander Ryumkin, Valery Ryumkin, Gennady Kravchenko, Evgeny Tyabaeu, Dmitry Khloptsov and Svetlana Trofimova

Exploration and Refinement of Regression Tree Models with Interactive Maps and Spatial Data Transformations 55

Qiuju Zhang, Menno-Jan Kraak and Connie A. Blok

Structuring Relations between User Tasks and Interactive Tasks using a Visual Problem-Solving Approach 56

Andreas Keler and Jukka M. Krisp

Visual Analysis of Floating Taxi Data based on selection areas 58

Beata Medynska-Gulij, Lukasz Halik, Lukasz Wielebski and Frank Dickmann

The Multiperspective Visualisation of the Spatial Behaviour of Smartphone Users..... 60

Giuseppe Borruso and Viola Defend

Mapping a City's Activity. A project of Volunteered Geographic Information using Mobile Mapping Collection..... 62

Lukasz Halik, Beata Medyńska-Gulij and Maciej Smaczyński

The Cartographic Visualizations of the Population Movements during Mass Events with the Use of Drone (UAV) 66

Sergio Estella and Jamie Gibson

Everyone Needs a Map! Evolving Information Society to Provide Insight from Big Data 68

M. T. Manrique, M. Wachowicz, T. Iturrioz and M. A. Manso

Towards Mapping Experience Design for the Internet of Things 70

<i>Pouria Amirian, Anahid Basiri, Francois Van Loggerenberg, Terry Moore, Trudie Lang and Margaret Varga</i>	
Intersection of Geospatial Big Data, Geocomputation and Cloud Computing	72
 <i>Lukasz Wielebski</i>	
The Graphical Attractiveness and Perceived Effectiveness of Cartographic Presentations of Spatio-temporal Accessibility....	74
 <i>Ossi Kotavaara, Tommi Hakkarainen, Tiina Huotari, Timo Keistinen and Jarmo Rusanen</i>	
Mapping Opportunities for Enhancing Effectiveness of Health Care System by GIS based Accessibility Analyses: Locating Core and Support Services within Long Distances in Northern Finland	76
 <i>Peter Ondrejka, Lukáš Herman, Jan Russnák, Petr Kubíček, Robert Cibula, Pavel Grochal, Josef Chrást, Adam Mertel and Daniel Vrbík</i>	
Spatial Analysis of Police Open Data as a Part of Community Policing – An Example of Pardubice City (Czech Republic)	92
 <i>Anita Graser, Maximilian Leodolter and Hannes Koller</i>	
Towards Better Urban Travel Time Estimates Using Street Network Centrality	98
 <i>Johannes Scholz, Thomas J. Lampoltshammer, Norbert Bartelme and Eveline Wandl-Vogt</i>	
Spatial-Temporal Modeling of Linguistic Regions and Processes with combined Indeterminate and Crisp Boundaries	100

Section III: Cartographic Technologies

René Sieber, Marianna Serebryakova, Raimund Schnürer and Lorenz Hurni

Atlas of Switzerland goes online and 3D – Concept, Architecture and Visualization Methods 102

Akila Sriramulu, Jochen Wendel, Syed Monjur Murshed and Alexandru Nichersu

Web-based Interface Development for 3D Geo-spatial Data Visualisation – An open-source and plug-in free approach 104

Mateusz Ilba

Advanced CityGML Visualization in 3D Environment 106

Anja Hopfstock, Dominique Laurent and Thomas van Ellett Braasch

ELF Basemap – Offering a European Reference Map Service .. 110

Ionuț Iosifescu Enescu, Raluca Nicola, Benjamin Kellenberger, Cristina Iosifescu Enescu, Roman Walt, Meda Hotea, Arlette Piguet and Lorenz Hurni

The Wheel of Design – Usability Driven Improvements to the GeoVITE User Interface 114

Erwan Bocher and Olivier Ertz

Towards Cartographic Portrayal Interoperability – the Revision of OGC Symbology Encoding Standard 116

Karachevtseva I.P., Kokhanov A.A., Rodionova Zh.F., Zharkova A.Yu., Zubarev A.E., Garov A.S., Matveev E.V. and J.Oberst

Modern Methodology for Planetary Mapping 120

Ilemen Kozmus Trajkovski, Katja Berkopec and Dušan Petrovič

Web Maps Adaptation for Smartphones..... 132

<i>Nguyen Cam Van, Le thi Kim Thoa, Nguyen Dinh Ky, Nguyen Truong Xuan and Nguyen Manh Ha</i>	
Building GIS Database for Web Atlas of the Tay Nguyen Region in Vietnam	144
<i>Filiz Kurtcebe Altin, Tolga Kaya, Mehmet Bilgekagan Cintimur and Tugba Aydar</i>	
Geospatial Project Management Portal	147
<i>Eric Losang</i>	
Where Have All the Atlases Gone? Developing Data Structures for a Virtual Research Environment	153
<i>Volker Walter, Dominik Laupheimer and Dieter Fritsch</i>	
Use of Paid Crowdsourcing for the Collection of Geodata	156
<i>Umberto Di Staso, Matteo Matassoni and Raffaele De Amicis</i>	
INSPIRE and VGI: Specie Distribution in Europe	160
<i>Otakar Čerba, Karel Charvát, Tomáš Mildorf, Raitis Berzins, Dymitry Kozhukh and Pavel Vlach</i>	
SDI4apps Points of Interest Knowledge Base	176
<i>Andrea Lopes Iescheck, Rita de Cássia Marques Alves, Manuella Anaís Rodrigues Fagundes and Gabriel de Souza</i>	
Data Quality Control for Topographic Mapping Production	178
<i>Alena Vondrakova and Vit Vozenilek</i>	
Licenses and Open Data in Cartography	180

Section IV: Cartographic Fundamentals

- Čeněk Šašík, Zdeněk Stachoň, Zbyněk Štěrba, Radim Štampach
and Kamil Morong*
New Approach to Experimental Testing in Cartography 182
- Andrea Pődör and József Halász*
Impact of Attentional Issues on Map Use Performance..... 185
- Claudia Robbi Sluter, João Vitor Meza Bravo and Melissa Midori*
**Research Investigations Related to User Centered Design
for Geoinformation Products** 190
- Monica Cristina de Castro and Claudia Robbi Sluter*
**Methodology for Automating Cartometric Evaluation of
Urban Topographic Maps in Brazil**193
- Wolf Günther Koch*
**Lexical Knowledge Sources for Cartography and GIS –
Development, Current Status and Outlook**..... 195
- Marinos Kavouras, Margarita Kokla and Eleni Tomai*
The GEOTHNK Approach to Spatial Thinking 198
- Chrysoula Boutoura, Alexandra Kousoulakou and Angeliki Tsorlini*
**Thematic Cartography: A Key Course in
Geospatial Engineering**..... 200
- Paulo Márcio Leal de Menezes, Manoel do Couto Fernandes,
Kairo da Silva Santos, Tainá Laetta and Juliana Rambaldi*
**Toponymy of Rio de Janeiro State, Brazil: From Historical
to Current Maps – Research and State of Art** 214
- János Györffy*
**Some Remarks on the Question of Pseudocylindrical
Projections with Minimum Distortions for World Maps** 217

Miljenko Lapaine and Nedjeljko Frančula
Map Projection Aspects 219

Ibrahim Oztug Bildirici
The Web Mercator Projection: A Cartographic Analysis221

Ádám Barancsuk
**A Semi-automatic Approach for Determining the Projection
of Small Scale Maps based on the Shape of Graticule Lines** 232

Section V: Cartographic Heritage and Historical Cartography in the Digital Era

José Jesús Reyes Nunez
A Forgotten Atlas of Erwin Raisz: “Atlas de Cuba” 234

Evangelos Livieratos
**The Matteo Ricci 1602 Chinese Word Map:
the Ptolemaean Echoes** 236

Marek Baranowski
The EuroCarto Heritage 238

Tomas Janata and Ruzena Zimova
**Iconographic Sources of Swedish Campaign in 1647
in a Multidisciplinary Rese** 240

Enikő Korodi
**Overview of the Geological Mapping in Transylvania
in the 19th Century** 242

Zsolt G. Török, Domonkos Hillier and Ádám Bérces
**Touch the Map and Take a Historic Walk:
Reviving Cartographic Heritage in the Danube Museum** 251

<i>Alexander Wolodtschenko</i>	
Conception of Mini-atlas “Virtual museum of Leo Bagrow”	258
<i>Marco Mastronunzio and Elena Dai Pra</i>	
Who Needs Mitteleuropa Old Maps? Present-day Applications of Habsburgic Cartographic Heritage	260
<i>Adam Mertel, Zdeněk Stachoň and Tomáš Glomb</i>	
Selected Issues of the Spatial Datasets focused on Historical Data	263
<i>Walter Vilém, Herman Lukáš and Stachoň Zdeněk</i>	
Reconstructive 3D Models of the Brno for the Years 1400, 1645 and 1749 and Their Use in Education	266
<i>Arkadiusz Borek and Tomasz Panecki</i>	
Cartographic Visualization of Historical Source Data on AtlasFontium.pl	272
<i>Mark Vetter and Boris Dreyer</i>	
Geomatic Methods Supporting the Investigation of Ancient History	274
<i>Dariusz Lorek</i>	
The Integrative Interpretation of Old Maps and Other Source of Spatial Information for Researching and Presenting Phenomena from Economic History.....	276
<i>Tünde Kiss</i>	
Changes of Landscape in the Sió-Sárvíz Valley (Transdanubia, Hungary) due to Human Activity. Analysis of Old Maps and Historical Data	279
<i>Markus Breier, Karel Kriz and Alexander Pucher</i>	
Digitising (Historical) Patterns of Power	284
<i>László Zentai</i>	
The Effect of the Political Transition of Hungary on Map Publishing.....	286

Section VI: Cartographic Applications

Tomas Kliment, Vlado Cetl and Marcel Kliment

Interoperable Volunteered Geographic Information empowering e-governance processes: Case study for Land Use Dataset in the City of Zagreb 299

Jan Feranec and Tomas Soukup

Sample of Map Representation of Land Cover Changes in Two and Three Time Horizons..... 301

Marina-Ramona Rujoiu-Mare and Bogdan-Andrei Mihai

Land Cover Mapping for Subcarpathian area (Romania) at different scales using currently available data models 305

Mirko Husak

Joint Information System (JIS) as Unique Land Register and Cadastral Information Systems..... 308

Alessia Movia and Maria Vittoria Santi

Mapping Abandoned Industrial Buildings: the Territory from Land Use to Reuse 310

Ngoc Quy Bui

Model Development for Web – Atlas System Applying in Administration Management 313

Mátyás Gede, Zsuzsanna Ungvári, Klaudia Kiss and Gábor Nagy

Open-source Web-based Viewer Application for TLS Surveys in Caves 321

Federico Prandi, Umberto Di Staso, Marco Berti, Luca Giovannini, Piergiorgio Cipriano and Raffaele De Amicis

Hybrid Approach for Large-scale Energy Performance Estimation based on 3D City Model Data and Typological Classification 329

<i>Jan D. Bláha and Martin Soukup</i>	
The Use of Methods of Cartography and GIS Tools in Cultural Anthropology Research: Pilot Study in Localities Yawan and Toweth (Papua New Guinea).....	331
<i>Bogdan Olariu</i>	
Anthropogenic Influence Mapping in Protected Areas: a Case Study from Bucegi Natural Park, Romanian Carpathians	333
<i>Markus Jobst and Tatjana Fischer</i>	
The Role of Service-Oriented Mapping in Spatial and Regional Sciences.....	335
<i>Burcu Akinci</i>	
The Role of Visual Representations in Urban Planning.....	338
<i>Csaba Szigeti and Gáspár Albert</i>	
Measuring the Adequacy of Maps for Field Use.....	341
<i>Xiaoling Wang, Corné P.J.M. van Elzakker and Menno-Jan Kraak</i>	
User Requirements Analysis for a Mobile Augmented Reality Application Supporting Geography Fieldwork	344
<i>Farid Karimipour, Negar Alinaghi, Paul Weiser and Andrew Frank</i>	
Contextual Adaptability of Navigational Spatial Descriptions: A Pragmatic Comparison	346
<i>Gustavo Dias Ramos, Claudia Robbi Sluter and Gislene Pereira</i>	
Requirements Survey and Documentation of a Geo-information System Applied to Land Value Capture Policies	348
<i>Adriana Alexandria Machado and Silvana Philippi Camboim</i>	
Designing an User-centric Academic SDI.....	351
<i>Vit Vozenilek</i>	
Maps in Documentary Videos	354
