Cartography and Art

Series: Lecture Notes in Geoinformation and Cartography

- ▶ **Helps to redefine how we can better visualize Space and Place, considering Science, Technology and Art**

The contributions in this book address the use of 'different' geo-communication tools that could allow for improved visualization of geography- by incorporating ART. It is envisaged that the work of this book will help to re-define how we can better visualise Space and Place, considering: Science, Technology and Art.

The book is therefore a celebration of the 'meeting point' between Art and Cartography. It provides a starting point for a journey that will explore innovative methods and techniques for representing our world using the complementary techniques from Art, Science and technology.
