TALKS**

Einladung zum Vortrag

Movement on the Move

Nico Van de Weghe, University of Ghent, Belgium

A general overview will be given of the research currently done at the CartoGIS Cluster (Department of Geography, Ghent University, Belgium). In the CartoGIS Cluster, both fundamental and applied research on various aspects of cartography and geographical information science is conducted. The research group focuses on four major research areas (data quality; geographical information production, infrastructure, management and modelling; risk analysis; analysis of moving objects).

In the presentation, specific focus will be given to the 'movement research': tracking of moving objects; modelling, representing, and reasoning about spatio-temporal information; cognition and linguistics of moving objects; time geography; ...

8. März 2011, 13:00 Uhr
